

Proudly Manufactured in Canada

The only PVC and single-ply roofing membrane
manufactured in Canada

When evaluating roofing systems for institutional, commercial, and industrial projects, product performance is only one consideration. Manufacturing location, quality control, supply chain reliability, and support can also play an important role in project success.

As the only PVC roofing membrane manufactured in Canada, **Goliath Roofing Systems** provides building owners, consultants, and contractors with a locally manufactured roofing solution back by decades of PVC expertise.

Backed by Decades of Experience

Goliath Roofing Systems is built on more than:

This experience helps ensure consistent manufacturing quality and performance.

Supporting Canadian Projects

Goliath PVC roofing membranes are well-suited for projects across:

- Schools and educational facilities
- Healthcare facilities and hospitals
- Government buildings
- Municipal facilities
- Universities and colleges
- Recreational and community facilities
- Industrial and commercial buildings

Ideal for Public and Institutional Projects

Many public-sector and institutional organizations place value on:

- Canadian manufacturing
- Supply chain reliability
- Long-term roofing performance
- Sustainable asset management
- Proven roofing systems

Goliath PVC helps support those objectives while delivering a roofing solution designed for long-term performance

Built in Canada. Designed for Canadian Buildings.
